● INDIA TRADE — SECTOR & POLICY RECOMMENDATIONS

Policy & investment insight dashboard

A direct, primary-source verification pass across 9 administering ministries/departments — not PIB, not press — covering every PLI/incentive scheme this repo tracks: how much of each scheme's outlay is actually utilized, what incentives remain, and whether the application window is still open. Also tests two specific data sources for state/sector development tracking — DPIIT's IEM Form A/B intent-to-implementation data and MoSPI's mega-project monitoring — and reports honestly where neither fits as cleanly as hoped.

SOURCES: MeitY, Ministry of Steel, Department of Heavy Industry, Department of Pharmaceuticals, DPIIT, Ministry of Textiles, Department of Chemicals & Petrochemicals, Ministry of Civil Aviation/Defence Production — each ministry's own site, annual reports, and Parliamentary Standing Committee submissions prioritized over PIB/press. Plus DPIIT's IEM data and MoSPI's PAIMANA portal. Retrieved 2026-07-19.

Citation corrections surfaced by this research pass

Fixes to apply across this repo

- **pharmaceuticals.gov.in is a dead domain** (confirmed NXDOMAIN) — the Department of Pharmaceuticals' live site is **pharma-dept.gov.in**. Every prior citation in this repo should be updated.
- The **~74% China API/KSM import-dependency figure** used elsewhere in this repo is not corroborated anywhere in DoP's own Annual Report 2025-26 — re-attribute to its actual source or flag as third-party.
- **RRPCL belongs to the Ministry of Petroleum & Natural Gas** (IOCL/BPCL/HPCL JV), not the Department of Chemicals and Petrochemicals — DCPC's own site has zero mention of it. Still no confirmed financial close found anywhere official.
- **GE-HAL F414 status upgraded**: technical/commercial terms finalized April 2026 (~80% tech transfer, ~$1bn value) — but no primary Indian-government or HAL source confirms a signed contract yet. Update from 'not signed' to 'terms finalized, signature pending.'

Scheme utilization, incentives & application status

14 schemes across 5 ministries/departments

OPEN accepting applications now PARTIALLY OPEN one sub-component only

CLOSING / RECENTLY CLOSED tenure ending or just wound up EXTENSION PENDING ministry itself requesting more time

CLOSED selection complete, no new applicants

PLI Large Scale Electronics Manufacturing MeitY

CLOSING

Outlay: ₹11,324cr

Investment target ₹7,000cr / achievement ₹10,905cr — but MeitY's own Parliament submission: 'only 2 applicants are performing out of 5 approved' (mobile domestic category); '1 out of 6... and 11 out of 16' performing (SEC categories).

Tenure closes 31 Mar 2026; 2026-27 Budget Estimate cut 81% to ₹1,345cr accordingly.

> OFFICIAL CHALLENGE / FINDING
>
> MeitY Secretary to Parliament: "Surrenders mainly come in the PLI, the electronics manufacturing... scheme... when private companies are not able to spend and file claims."

SPECS (electronic components, pre-ECMS) MeitY

CLOSED

Outlay: ₹3,285cr

52-58 approved; proposed ₹14,798-20,000cr, actual ₹9,067-9,482cr (~46-61%). Only ₹584cr incentive released to 13 applicants.

Closed to new applications 31 Mar 2024; disbursement continues to 2029. Superseded by ECMS.

ECMS (SPECS successor) MeitY

OPEN

Outlay: ₹22,919cr

24 approved (Dec 2025); ₹12,704cr projected investment, ₹1,09,517cr production, ~17,000 jobs. A widely-circulated 75-application figure could not be verified on a MeitY page.

Notified Apr 2025, 6yr + 1yr tenure — rolling approvals continuing.

India Semiconductor Mission (ISM + Semicon 2.0) MeitY / ISM

OPEN

Outlay: ₹2,03,500cr

10 projects approved by Dec 2025 (1 foundry, 9 OSAT), ~₹1.6 lakh cr cumulative investment. Semicon 2.0 (₹1,27,500cr) approved 15 Jul 2026.

First Semicon 2.0 fab scheduled for commissioning 2028; rolling approvals continuing.

> OFFICIAL CHALLENGE / FINDING
>
> MeitY, Standing Committee Report 17: fund utilization was 23% (FY23-24), 9% (FY24-25) — companies 'have not yet claimed the funds... because these are complex projects requiring intensive planning.'

PLI Specialty Steel Ministry of Steel

RECENTLY CLOSED

Outlay: ₹6,322cr

Cumulative committed ₹43,874cr (Rounds 1.0+1.1), over ₹22,000cr invested. No itemized company list published — only aggregate counts (44/19 Round 1.0, 42/25 Round 1.1).

Round 1.2 launched 4 Nov 2025 (22 sub-categories); disbursal begins FY2026-27.

> OFFICIAL CHALLENGE / FINDING
>
> Ministry of Steel Annual Report 2025-26: capacity utilization DIPPED to 76% in FY2024-25 from 80% the year before; coking coal import dependence (~57 MMT/yr) named as an ongoing challenge.

PLI Automobile & Auto Components `Dept. of Heavy Industry`

CLOSED

`Outlay: ₹25,938cr`

82 approved (18 OEM + 64 Component). Committed ₹67,690cr vs ₹42,500cr target — but ACTUAL investment only ₹35,657cr, incremental sales just ₹32,879cr against a ₹2,31,500cr projection.

Selection completed; all 82 slots filled.

> OFFICIAL CHALLENGE / FINDING
>
> Rajya Sabha Standing Committee, 332nd Report (11 Mar 2026): 'serious concern over the massive disconnect between the approved subsidy path and the actual meagre allocations and utilisations.'

PLI ACC Battery Storage `Dept. of Heavy Industry`

PARTIALLY OPEN

`Outlay: ₹18,100cr`

40 of 50 GWh target allocated — but only 1 GWh actually commissioned (2.5%). Actual investment just ₹2,680cr vs ₹9,000cr minimum required. ZERO incentive disbursed ('non-fulfilment of eligibility conditions').

Remaining 10 GWh (Grid Scale Stationary Storage) still under bid finalization — the only open sliver.

> OFFICIAL CHALLENGE / FINDING
>
> New finding: of the original 4 awardees (incl. Hyundai Global Motors, 20 GWh), Hyundai is absent from every current DHI document. Only 3 firms/30 GWh remain officially listed — the 'missing' 20 GWh was quietly re-tendered.

PLI Bulk Drugs (Critical KSMs/APIs) `Dept. of Pharmaceuticals`

CLOSED

`Outlay: ₹6,940cr`

48 projects/33 products approved. Committed ₹4,330cr; ACTUAL investment ₹4,763cr — exceeds commitment (110%). Sales ₹2,313cr incl. ₹508cr exports.

Selection completed across all rounds.

PLI Pharmaceuticals (formulations) `Dept. of Pharmaceuticals`

CLOSED

`Outlay: ₹15,000cr`

55 approved (incl. 20 MSMEs). Committed ₹17,275cr; ACTUAL investment ₹40,890cr — 237% of commitment, the strongest performer in this dashboard. Sales ₹3,16,797cr, target already exceeded.

Selection completed across all rounds.

PLI Medical Devices `Dept. of Pharmaceuticals`

CLOSED

`Outlay: ₹3,420cr`

Cumulative sales ₹12,344cr incl. ₹5,869cr exports. Commissioned: Meril Group (Vapi, ₹1,400cr), BPL Medical (Bangalore, ₹317cr).

Greenfield-only, selection completed.

Medical Device Parks (4 states) Dept. of Pharmaceuticals

EXTENSION PENDING

Outlay: ₹400cr

194 manufacturers allotted land across UP/MP/TN; only 2 of 32 under-construction companies have commenced commercial operations. Himachal Pradesh formally withdrew 7 Sept 2024.

Extended to FY2025-26; Department itself proposing a further 2-year extension to FY2027-28.

OFFICIAL CHALLENGE / FINDING

DoP Annual Report 2025-26: "the envisaged objectives are yet to be fully achieved" — a direct admission of underperformance.

Bulk Drug Parks (AP, Gujarat, Himachal Pradesh) Dept. of Pharmaceuticals

EXTENSION PENDING

Outlay: ₹3,000cr

AP: 2,002 acres/₹1,877cr. Gujarat: 2,015 acres/₹2,507cr. HP: 1,405 acres/₹1,923cr. A 2nd ₹300cr tranche went to Gujarat (Nov 2025) — no equivalent 2nd tranche to AP or HP found.

Tenure extended to FY2026-27; further extension under review.

OFFICIAL CHALLENGE / FINDING

DoP's own verdict, verbatim: "The three bulk drug parks are in various stages of development" — no commissioning date given for any, nearly 6 years after approval.

PLI White Goods (ACs & LED Lights) DPIIT

CLOSED

Outlay: ₹6,238cr

85 companies across 4 rounds (final: 23 Jan 2026). Committed ₹11,198cr. One applicant explicitly withdrew (Round 3); Round 3's 84 provisional selections shrank to 80 final beneficiaries with no explanation given.

Round 4 was explicitly final — 85 is now the closed, complete cohort.

OFFICIAL CHALLENGE / FINDING

DPIIT frames every one of 4 reopening rounds positively ('appetite of industry to invest more,' 'continued interest') — never once describing the scheme as undersubscribed, despite needing 4 rounds plus a 90-day reopening to fill.

PLI Textiles (MMF & Technical Textiles) Ministry of Textiles

CLOSED

Outlay: ₹10,683cr

170 applicants across 3 rounds. Committed ₹41,533cr. Actual investment (Rounds 1-2 only) just ₹6,416cr of ₹28,711cr committed (~22%) — only 26 of 74 had commenced production.

Round III completed; Oct 2025 amendment broadened HSN codes but entirely within MMF scope — no cotton-apparel broadening despite this repo's own recommendation.

OFFICIAL CHALLENGE / FINDING

Ministry's own National Fibre Mission Concept Note: "the PLI scheme focuses on downstream MMF fabrics and apparel" — cotton is handled by a wholly separate scheme, with fibre-specific schemes operating "in silos with limited convergence."

PM MITRA textile parks — a separate infrastructure scheme

`7 sites approved`

7 approved sites (5 greenfield: Tamil Nadu/Virudhunagar, Gujarat/Navsari, Karnataka/Kalaburagi, Madhya Pradesh/Dhar, Uttar Pradesh/Lucknow; 2 brownfield: Telangana/Warangal, Maharashtra/Amravati). 100% land acquisition completed and transferred to SPVs across all 7; environmental clearance obtained for all; ₹63,177cr in investment interest/MoUs; ₹4,808cr of infrastructure works in progress. **But commercial production has started in only ONE of the seven parks (Telangana)** as of the Ministry's own most recent progress table.

IEM Form A / Form B: can it show conversion for projects above ₹150cr?

`Honest answer: no, not as DPIIT publishes it`

THE HONEST FINDING

DPIIT's published IEM data has **no investment-size band anywhere** — not in the monthly IEM Statistics Report, not in the Annual Report appendices, not on the NSWS filing portal. The ₹150 crore threshold doesn't belong to DPIIT/IEM at all — it's **MoSPI's** separate cutoff for Central Sector infrastructure monitoring, a different dataset entirely with no shared key. A clean "Form A/B for projects above ₹150cr" filter is not possible from public data as it stands. **Update (verified interactively 2026-07-19):** searching "IEM" in DPIIT's restructured publications listing returns *"No Data Available"*, and the legacy SIA-statistics route is a dead page — the monthly IEM Statistics Report series is now verifiably absent from the listing, not merely unconfirmed.

Best available proxy: same-year aggregate flow ratio (Part-B ÷ Part-A that year) — NOT a cohort-matched conversion rate

2020	**56.4%**
2021	**45.1%**
2022	**59%**
2023	**54.2%**

2024*		56.4%

5-year aggregate (2020 – Nov 2024): **53.1%**. Part-B filings in any year come overwhelmingly from Part-A filings issued in earlier years — DPIIT's own raw data shows gaps from months to over a decade (one company's Part-A was dated 1964, its Part-B filed in 2024). DPIIT publishes no explanation for why aggregate intent consistently exceeds aggregate implementation.

MoSPI mega-projects: does it show state-level development in these 10 sectors?

Honest answer: no, it's scoped to public infrastructure only

THE HONEST FINDING

MoSPI's Infrastructure and Project Monitoring Division tracks Central Sector projects ≥₹150cr implemented by **ministries, PSUs, and statutory agencies** — roads, rail, power, coal, PSU steel-plant upgrades. **None** of this repo's 10 priority sectors appear as tracked categories (confirmed by a full-text search of the March 2026 Flash Report). MoSPI also quietly stopped classifying projects as "delayed" after May 2025 — a real transparency regression from its earlier reporting.

Sectors MoSPI actually tracks (1,941 ongoing projects, ₹41.5 lakh crore revised cost) — none of this repo's 10 priority sectors present

Roads & Highways (1,120) · Coal (119) · Railways (246) · Oil & Gas (93) · Transmission & Distribution (68) · Electricity Generation (36) · Steel — SAIL/PSU only (18) · Healthcare (36) · Education (30) · Water Resources (41) · Urban Transport (26) · Aviation — airports (26) · Energy Storage — pumped-hydro (15) · Electronics (0) · Specialty Steel/private (0) · Auto/EV/Battery (0) · Pharma (0) · White Goods (0) · Chemicals (0) · Plastics (0) · Aircraft & Spacecraft (0) · Medical Devices (0) · Textiles (0)

"Energy Storage" (15 projects) sounds relevant but is confirmed to be pumped-hydro plants run by NHPC/NTPC — not battery gigafactories. "Steel" (18 projects, ₹17,812cr) is entirely SAIL/PSU plant upgrades (Bhilai, Bokaro, IISCO) — no Tata Steel or JSW project appears.

State-wise mega-project table exists — but measures public infrastructure spend, not private manufacturing FDI

STATE	MEGA-PROJECTS TRACKED	REVISED COST (₹CR)
Andhra Pradesh	138	₹2,11,025cr
Assam	88	₹1,20,333cr

STATE	MEGA-PROJECTS TRACKED	REVISED COST (₹CR)
Arunachal Pradesh	22	₹66,942cr

None of this repo's named flagship private projects (Tata Steel Kalinganagar, Micron Sanand, Tata-PSMC Dholera, Reliance's battery gigafactories, RRPCL) appear in this tracking. What does appear: the enabling public infrastructure around some hubs — "Development of Dholera International Greenfield Airport" (AAI, ₹1,305cr) and "Transmission System for Reliable Power Supply to Dholera" (POWERGRID, ₹319cr).

DPIIT publications update: the FDI series just gained a year

dpiit.gov.in/documents/publications, checked 2026-07-19

The **Quarterly FDI Factsheet for Q4 FY2025-26** (published 3 Jun 2026) closes the full FY2025-26 year: **FDI equity inflow ₹5,16,936cr / $58.85bn — up 23% in INR and 18% in USD over FY2024-25** ($50.02bn). This extends this repo's FDI series by a full year: the FDI-vs-PLI-launch bulletin's sector tables end at FY2024-25, when the national cycle was flat-to-declining — any post-FY25 sector re-analysis must re-baseline against a now-*rising* national cycle. Sector-wise and state-wise FY2025-26 splits are in the same factsheet (Services and Computer Software & Hardware still top; Maharashtra/Karnataka/Gujarat the top states) but are not yet re-extracted into the sector verdicts — flagged as the first task for the next quarterly refresh, along with the updated FDI metadata document (27 Feb 2026) that may supersede the "Documentation on methodology: Not applicable" version this repo quotes.

AHIDF: the counter-example that proves transparency is a choice

Animal Husbandry Infrastructure Development Fund, DAHD

THE VERDICT

AHIDF's dashboard (a public, no-login Power BI report at ahidf.udyamimitra.in, **refreshed nightly** — "Data Last Updated on 19-07-26, 12:11 AM" when checked) is a **genuine counter-example** to everything above: state-wise, district-wise, and bank-wise splits; the full application funnel *including rejections and withdrawals*; and sanctioned **and** disbursed amounts side by side. No PLI ministry publishes anything close. **Its precise ceiling**: still aggregates-only (no project/promoter list), and it stops at "loan disbursed" — one gate short of "project operational."

The funnel AHIDF actually publishes (₹ crore where amounts)

Applications received	**11,026**
Eligible	**1,592**

Sanctioned by lender	910
Disbursed	357

Alongside: 3,974 rejected in screening, 3,939 withdrawn, 304 rejected by lenders — **~96% of applications have not reached disbursement**, and the scheme window closes 31.03.2026 with ~₹5,405cr disbursed against a ~₹29,610cr outlay envelope. State leaders (approved projects, Lok Sabha USQ 251): Maharashtra 63 projects/₹1,836cr, West Bengal 31, UP 30, Tamil Nadu 29/₹1,295cr. Caveats: at least four different "sanctioned" counts circulate depending on stage (910 lender sanctions vs 541/486/366 in ministry documents); the employment KPI (94,593) is a projection "from Sanction Stage," not measured jobs; and DAHD's own page states a ₹29,110cr outlay while the Cabinet announcement says ₹29,610cr — an unresolved ₹500cr discrepancy.

Cross-cutting synthesis

What this ministry-verification pass adds to the repo's earlier findings

Across every scheme with a published committed-vs-actual figure, the pattern from the FDI-vs-PLI-launch bulletin repeats at the scheme-disbursement level: Pharma (both Bulk Drugs and Pharmaceuticals) dramatically over-delivers against its own committed investment; Auto and ACC Battery dramatically under-deliver, with ACC Battery showing zero disbursed incentive and a confirmed (if unstated) awardee exit; Steel and Textiles sit in between.

Every scheme that reopened its application window multiple times (White Goods: 4 rounds + a 90-day reopening; Textiles: 3 rounds) is described by its own ministry in exclusively positive language — none of the 9 ministries researched ever uses the word "undersubscribed" about its own scheme in a primary document, even where the repeated-reopening pattern strongly implies it.

The two data sources this dashboard was specifically asked to use — IEM Form A/B above ₹150cr, and MoSPI's state-level mega-project dashboard — both turned out not to fit the task, for the same underlying reason: India's investment-tracking infrastructure is fragmented across agencies with no shared project-identification key or size threshold. DPIIT tracks entrepreneurial intent-to-implementation with no size filter; MoSPI tracks public-infrastructure cost/schedule performance with a size filter but zero private-sector coverage. Neither can answer "how much announced private manufacturing investment in state X actually landed" — which is exactly the question this repo's other bulletins have had to answer instead through company-by-company detective work (e.g. the Jio Platforms/Gujarat finding).

The AHIDF counter-example sharpens the verdict: the barrier to scheme transparency is not technical — a central ministry already runs a nightly-refreshed, state-wise, funnel-complete public dashboard today, rejections and withdrawals included. The PLI ministries could publish AHIDF-style funnels tomorrow; none do. And even AHIDF stops at the disbursement gate, so "how much announced investment became an operating plant" remains unanswerable from official dashboards across every scheme this repo tracks.

ERRATA & METHODOLOGY NOTES

- **"Application status" reflects each scheme's most recent published round** — several PLI schemes accept periodic reopened windows even after being marked "closed" here; always check the ministry's current notification before assuming a door is permanently shut.
- **No ministry researched ever describes its own scheme as "undersubscribed"** in a primary document, even where repeated reopening rounds strongly imply it — every reopening is framed as evidence of growing industry interest. This repo does not adopt that framing uncritically.
- **The IEM and MoSPI sections are included specifically to show where the requested data doesn't fit**, not to force a stretched connection — India's investment-tracking infrastructure is fragmented across agencies with no shared project key.
- Underlying data: data/policy_investment_dashboard_2026-07-19.json.
