Linkage: the ethanol supply side gets its capacity subvention (sugar package) exactly as feedstocks widen — the loop that closes in 2022/2026. NPE-2019 seeds the PLI architecture a year before its launch. Export credit capacity (ECGC/NEIA) is recapitalised as merchandise exports plateau.

Retrospective series generated from data/pib_index.sqlite (122,141 releases, 2017-2026; pre-2017 launches traced through later releases — the modern portal's day-wise record begins in 2017), the classified Cabinet-launch datasets, and session-verified trade/FDI/forex anchors. Years the register cannot reach carry fewer anchors by design. Full methodology: the quarterly-refresh blueprint on herrickschaw.github.io/india-trade-sector-policy-recommendations.
