Verified anchors for the year

ANCHOR	VALUE	SOURCE
FDI inflow FY21	\$81.72bn — record	PRID 1721268
Coal tranche-1	19/38 mines; Rs 6,656cr/yr state revenue	PRID 1671487
Ethanol blending	7.93% (ESY 20-21); 302.30cr litres	PRIDs 1736751/1782735

Linkage: the guarantee stack (ECLGS/AIF/AHIDF) defends the credit channel while the PLI fan-out chases the import bill; record FDI funds the gap. The ethanol subvention widening is the supply-side push that makes 10% blending reachable a year later.

Retrospective series generated from data/pib_index.sqlite (122,141 releases, 2017-2026; pre-2017 launches traced through later releases — the modern portal's day-wise record begins in 2017), the classified Cabinet-launch datasets, and session-verified trade/FDI/forex anchors. Years the register cannot reach carry fewer anchors by design. Full methodology: the quarterly-refresh blueprint on herrickschaw.github.io/india-trade-sector-policy-recommendations.
