Verified anchors for the year

ANCHOR	VALUE	SOURCE
Trade deficit FY22	−\$191bn (five-year series base)	TRADESTAT series
Production-linked share of the year's new commitments	11.2% — missions carried 6x	five-year evolution dataset

Linkage: 11 PLI schemes launch — yet the rupees concentrate in RDSS/AMRUT/SBM missions. The deficit series that motivates everything starts its climb from −\$191bn.

Retrospective series generated from data/pib_index.sqlite (122,141 releases, 2017-2026; pre-2017 launches traced through later releases — the modern portal's day-wise record begins in 2017), the classified Cabinet-launch datasets, and session-verified trade/FDI/forex anchors. Years the register cannot reach carry fewer anchors by design. Full methodology: the quarterly-refresh blueprint on herrickshaw.github.io/india-trade-sector-policy-recommendations.
