Verified anchors for the year

ANCHOR	VALUE	SOURCE
Trade deficit FY24	−\$241bn (the one improvement year)	TRADESTAT series
Solar installed	~70.1 GW (Aug 2023)	PRID 1947140
Ethanol blending	14.6% (ESY 23-24)	Factsheet 150699
MUDRA 8-year	40.82cr loans, Rs 23.2L cr	PRID 1914739

Linkage: the deficit's only improvement year coincides with the capex pivot — and SATAT's voluntary model is formally abandoned for a mandate, the cohort's clearest design lesson happening in real time.

Retrospective series generated from data/pib_index.sqlite (122,141 releases, 2017-2026; pre-2017 launches traced through later releases — the modern portal's day-wise record begins in 2017), the classified Cabinet-launch datasets, and session-verified trade/FDI/forex anchors. Years the register cannot reach carry fewer anchors by design. Full methodology: the quarterly-refresh blueprint on herrrickshaw.github.io/india-trade-sector-policy-recommendations.
