Linkage: the critical-minerals chain assembles as China's export controls bite; ECMS opens the components lane the electronics trade data demanded; the deficit resumes widening — the pressure that produces 2026's wave.

Retrospective series generated from data/pib_index.sqlite (122,141 releases, 2017-2026; pre-2017 launches traced through later releases — the modern portal's day-wise record begins in 2017), the classified Cabinet-launch datasets, and session-verified trade/FDI/forex anchors. Years the register cannot reach carry fewer anchors by design. Full methodology: the quarterly-refresh blueprint on herrickshaw.github.io/india-trade-sector-policy-recommendations.
