Linkage: the worst deficit year of the series meets the largest non-PLI instrument wave — funds, packages and employment-linked payouts replacing production-linked design; E20 lands as the standing proof that the loop can close.

Retrospective series generated from data/pib_index.sqlite (122,141 releases, 2017–2026; pre-2017 launches traced through later releases — the modern portal's day-wise record begins in 2017), the classified Cabinet-launch datasets, and session-verified trade/FDI/forex anchors. Years the register cannot reach carry fewer anchors by design. Full methodology: the quarterly-refresh blueprint on herrickshaw.github.io/india-trade-sector-policy-recommendations.
