Linkage: succession day (15 Jul) extends the proven electronics lane and the assured-return urea design in one sitting — the matured cohort's guaranteed-terms family, applied to the two biggest verified swings still in progress.

Retrospective series generated from data/pib_index.sqlite (122,141 releases, 2017–2026; pre-2017 launches traced through later releases — the modern portal's day-wise record begins in 2017), the classified Cabinet-launch datasets, and session-verified trade/FDI/forex anchors. Years the register cannot reach carry fewer anchors by design. Full methodology: the quarterly-refresh blueprint on herrickshaw.github.io/india-trade-sector-policy-recommendations.
