

Master Report

The master reference document for the India Trade & FDI/PLI analysis: every finding, figure, grade, and correction from the full research program in one place, with sources. This document is the source of truth from which the FDI pitch deck, dashboards, and bulletins can be updated -- when a number changes here, the derived outputs follow.

Retrieved: 2026-07-19 · Method: Compiled from the program's published bulletins, which rest on: direct extraction from DPIIT/RBI/ministry primary documents (annual reports, appendices, scheme portals); PIB Parliament-answer releases verified against release text with PRIDs; Parliamentary Standing Committee submissions (sansad.in); 20+ parallel research passes with adversarial verification; and independent cross-validation again...

Executive Summary

- India's FY2025-26 trade position: exports \$441.7bn (+0.9% YoY), imports grew +7.4%, trade deficit \$333.2bn -- widened 17.5% in a single year. Over 5 years imports grew 5.7x faster than exports. FDI equity inflow \$58.85bn (+18% YoY); total FDI incl. reinvested earnings \$88.3bn (Apr-Feb).
- The PLI program's outcome numbers are large and compounding (Rs 2.16 lakh cr investment, Rs 20.41 lakh cr production, Rs 8.3 lakh cr exports, 14.39 lakh jobs as of 31 Dec 2025) -- but incentive DISBURSAL stands at Rs 28,748cr, roughly 15% of the outlay, and is concentrated in two sectors (Electronics and Pharma).
- The export half of import substitution is demonstrably working in scheme-covered chapters (electronics exports +324% over 5yrs to \$54bn; smartphones India's #1 export item in CY2025); the import half is not yet visible at chapter level (electronics imports also doubled to \$104.9bn -- the input side of the export boom).
- Sector verdicts (re-run on FY2025-26 FDI): 1 green (Pharma), 6 amber, 3 red. Both former greens fell -- Electronics FDI -43.5% and Medical Devices -40.4% against a national cycle up 18% -- while Pharma doubled (+114%) after Rs 5,433cr of disbursement, materially weakening the COVID-reshoring counter-explanation.
- India's official investment-tracking data has documented, admitted defects: state-wise FDI is attributed by registered office (proven via Jio Platforms/Gujarat), the monthly IEM statistics series died with the NSW migration, MoSPI's mega-project portal covers no private manufacturing, and no PLI ministry publishes beneficiary-level production status. AHIDF proves the capability exists (a nightly-refreshed, funnel-complete public dashboard) -- so the opacity is a choice.
- Six ranked action items to further reduce the trade deficit: launch the chemicals/plastics PLI (\$36.4bn uncovered imports), extend PLI Textiles to cotton apparel, deepen ECMS component localization, fix ACC Battery execution (zero disbursed), re-verify the Electronics/Medical-Devices FDI reversals next quarter, and mandate AHIDF-style funnels for every scheme.

Part 1 Trade Position Fy2025 26

Headline Numbers

METRIC	VALUE	CHANGE	SOURCE
Merchandise exports	\$441.7bn	+0.9% YoY; +4.7% over 5yrs	MOCI via Exim Bank May-2026 tracker; matches repo TRADESTAT tables
Merchandise imports	\$776.0bn	+7.4% YoY; +26.6% over 5yrs	TRADESTAT FY2025-26
Trade deficit	\$333.2bn	widened from \$283.5bn (+17.5% in one year)	Exim/MOCI; repo computed \$334.3bn -- cross-validated within 0.3%
Non-petroleum exports	\$387.9bn	+3.6%	Exim May-2026
FDI equity inflow	\$58.85bn (Rs 5,16,936cr)	+18% USD / +23% INR	DPIIT Q4 FY26 Factsheet, 3 Jun 2026
Total FDI incl. reinvested earnings	\$88.3bn (Apr-Feb FY26)	rising	RBI basis, via Exim tracker
Deficit driver, bilateral	China -\$112.2bn	more than double the next-largest, unmoved by 6 years of PLI	repo country bulletin

61	Apparel, knitted	7.6	-2.3	mismatch (PLI covers MMF only)

Honest Reading

The export half of the import-substitution thesis is showing real progress in scheme-covered chapters -- the only declining export chapters are the cotton-apparel ones PLI structurally misses. The import half is not yet visible at chapter level: HS85 imports also doubled (components feeding the assembly boom), and total imports grew 5.7x faster than exports over five years. The trade-deficit lever is two-sided: deepen component localization where export momentum exists, and open schemes where the fastest-growing import bills have none.

Part 2 Sector Verdicts

Criteria

Same criteria across both runs: did real DPIIT/RBI-tracked FDI equity inflow rise after the scheme's launch, distinguishable from the national cycle and from named confounders? Traffic lights: green = real, sustained, attributable rise; amber = mixed/confounded/too early; red = no lever or declining with no scheme.

Verdicts Table

SECTOR	FY19 FDI USD M	FY25 FDI USD M	FY26 FDI USD M	FY26 CHANGE PCT	ORIGINAL VERDICT	RERUN VERDICT	NOTE
Electronics & Semiconductors	451.88	2043.04	1153.42	-43.5	green	amber	FDI nearly halved in FY26 while national FDI grew 18%; landed capacity real (Micron, CG Semi, Kaynes producing) but increasingly domestic-funded; ISM fund utilization was 23% (FY24) and 9% (FY25) per MeitY's Parliament submissions.
Medical Devices	156.72	626.99	373.84	-40.4	green	amber	The 'cleanest positive result' reversed -- the concentration risk the original verdict flagged (a few MNC deals)

SECTOR	FY19 FDI USD M	FY25 FDI USD M	FY26 FDI USD M	FY26 CHANGE PCT	ORIGINAL VERDICT	RERUN VERDICT	NOTE
							materialized. 19 greenfield plants commissioned; production story ahead of FDI story.
Pharma & Bulk Drug APIs	265.97	891.43	1911.64	114.4	amber (rose but confounded)	green	Doubled to the series' highest level, landing AFTER Rs 5,433cr disbursement and investment at 237% of commitment -- the COVID-reshoring counter-explanation is now materially weaker.
Auto, EV & Battery	2623.22	1586.31	2459.35	55.0	amber	amber (improving)	Strong rebound but the FY21-22 lesson (one PE deal, +327%, fully reverted) demands deal tracing; ACC execution still 1 of 40 GWh commissioned, zero disbursed.
White Goods Components	976.5	531.49	840.44	58.1	amber (too early)	amber (improving)	First meaningful post-launch rise, consistent with full subscription only landing Jan 2026 -- one year of evidence.
Specialty Steel & Metals	598.84	950.99	838.78	-11.8	amber	amber	Still below pre-launch baseline; POSCO-JSW's \$7.73bn moved Apr 2026 and lands in FY27 data -- next year is the real test. Capacity utilization dipped to 76%.
Aircraft & Spacecraft			268.16		amber	amber	Proxy too coarse for YoY reads. C295 line operating; GE-HAL F414 terms finalized Apr 2026, signature pending. No production-incentive scheme; imports +80.9% (5yr).
Inorganic Chemicals			852.87		red	red	Imports +86% to \$14.2bn, no scheme. Chemicals PLI under formulation + Rs 600cr Chemical Parks budgeted FY26-27 -- a signal, not capacity.
Plastics			214.56		red	red	Imports +45.8% to \$22.2bn -- the largest no-scheme import bill. RRPCL (belongs to MoPNG, not DCPC) still short of financial close.
Textiles & Apparel (cotton)					red	red	Cotton apparel exports still declining and still structurally

SECTOR	FY19 FDI USD M	FY25 FDI USD M	FY26 FDI USD M	FY26 CHANGE PCT	ORIGINAL VERDICT	RERUN VERDICT	NOTE
							outside PLI Textiles; the Oct 2025 amendment broadened HSN codes entirely within MMF scope. Ministry's own National Fibre Mission note admits the scheme 'focuses on downstream MMF fabrics and apparel' with fibre schem...

Control Sectors Note

Original-run control group (no-PLI sectors, FY19-FY25): Chemicals -46.5%, Rubber Goods (plastics proxy) -58.8%, Misc Mechanical (aircraft proxy) -5.5% -- against the six PLI sectors' +30.7% average, but that gap was carried by 2-3 sectors, not all six.

Part 3 PLI Program Assessment

Aggregates Three Vintages

AS OF	SOURCE	INVESTMENT	PRODUCTION	EXPORTS	JOBS	APPLICATIONS	DISBURSED
~Nov 2024	PRID 2114011 (22 Mar 2025)	Rs 1.61 lakh cr	~Rs 14 lakh cr	Rs 5.31 lakh cr	>11.5 lakh	764	Rs 14,020cr
30 Jun 2025	PRID 2201280 (DPIIT Year-End Review, 10 Dec 2025)	>Rs 1.88 lakh cr	>Rs 17 lakh cr	>Rs 7.5 lakh cr	>12.3 lakh		
31 Dec 2025	PRID 2230621 (20 Feb 2026) + PRID 2246089/2246085 (27 Mar 2026)	>Rs 2.16 lakh cr	>Rs 20.41 lakh cr	>Rs 8.3 lakh cr	>14.39 lakh	836	Rs 28,748cr

Outlay Inconsistency

PIB states the total program outlay as Rs 1.97 lakh cr (Year-End Review) and Rs 1.91 lakh cr (PRID 2230621) in different releases -- flagged, not reconciled.

Scheme Report Card

GRADE	SCHEME	MINISTRY	OUTLAY	APPROVED	COMMITTED INVESTMENT	ACTUAL INVESTMENT	DISBURSED	EVIDENCE

Hyundai Global Motors' original 20 GWh exited without 'withdrew' appearing in any government document; the freed capacity was re-tender...

IEM Record**Grade****B+****Series**

YEAR	PART A FILED	PART A RS CR	PART B FILED	PART B RS CR	IMPLEMENTATION RATIO PCT
2021	1489	771428	812	347978	45.1
2022	1185	424101	916	250064	59.0
2023	1267	510852	968	276925	54.2
2024	986	602082	1165	493765	82.0
2025 (to Dec)	702	530416	998	583096	109.9

Findings

- Implementation exceeded same-year intent for the first time in 2025 (109.9%) -- reading as the 2021-22 intent surge (Rs 7.7 lakh cr proposed in 2021) maturing into implementation. Same-year flow ratio, not cohort-matched -- Part-B lags Part-A by months to decades.
- Part-A filing counts fell steeply (1,267 -> 986 -> 702), consistent with the Apr 2025 eligibility-threshold raise (Rs 50cr -> Rs 125cr plant & machinery): fewer, larger IEMs.
- The monthly IEM Statistics Report series is verifiably dead post-NSWS migration ('No Data Available' in DPIIT's own publications search); the annual Appendix series survives. NSWS itself publishes zero statistics. No investment-size band exists anywhere in the data, so a >Rs 150cr filter is impossible.
- Revision warning: 2024's Part-B grew Rs ~2 lakh cr between the AR 2024-25 snapshot (to Nov) and AR 2025-26's full-year column -- partial-year IEM figures are heavily provisional.
- Source: DPIIT Annual Report 2025-26, Appendices III-VI, Grand Total rows extracted from the PDF directly; a previously-generated derived workbook verified accurate on all 24 numbers with one footnote corrected (both parts run 'Up to Dec 2025').

Part 5 Capital And Financing

India Two Tier Cost Of Capital

TIER	RATE	NOTE
RBI repo rate	5.25%	After 125bp of cuts through 2025; held 3 straight meetings into mid-2026 (61st MPC, 5 Jun 2026)
AAA corporate bonds 3-5yr (Tata Sons / Reliance tier)	~7.4-8.3%	The cheapest domestic tier; AA- (Adani) pays 8.6-8.9%
WALR fresh rupee loans	8.51% (May 2026)	All-sector average
1-yr MCLR system median	8.50% (Jun 2026)	SBI 8.70 / HDFC 8.45 / ICICI 8.35 / PNB 8.80 / BoB 8.75
EBLR-priced ordinary corporate borrower	~9.5-10.5%	Repo + spread; now 67.6% of the banking system's floating-rate book

Target Country Policy Rates

COUNTRY	RATE	TRAJECTORY
Japan	1.00%	hiking from near-zero (highest since 1995)
Denmark	1.85%	hike, tracks ECB
Taiwan	2.00%	held 9 straight quarters
Eurozone (Germany/France)	2.25%	first hike in 3 years
South Korea	2.75%	fresh hiking cycle (Jul 2026)
Israel	3.50%	active cutting cycle
USA	3.50-3.75%	held after 2025 cuts
UAE	3.65%	tracks the Fed
Saudi Arabia	4.25%	tracks the Fed

Financing Pattern Findings

- Every target FDI-source country's policy rate sits below India's 5.25% repo -- from 4.25 points cheaper (Japan) to 1.6 (Saudi). Against India's ordinary-borrower tier the gap is 6-8.5 points;

against the AAA tier it narrows to 1.5-3 for the US/UAE/Israel/Saudi.

- The domestic-vs-FDI split follows TECHNOLOGY OWNERSHIP: where an Indian conglomerate has scale and doesn't need foreign IP (steel, chip packaging, battery cells), domestic AAA-tier self-funding is economically rational (Assam/Tata Electronics, Odisha/Tata Steel-Jindal, Gujarat gigafactories, Karnataka/JSW-Ola). Where the enabling technology is foreign-owned (compressors, appliance R&D, medical imaging, auto platforms), FDI is closer to a requirement (Andhra/Daikin-LG, Maharashtra's foreign OEM...
- ICRA cross-check of the risk-absorption story is inconsistent: strongest for Defence (DPSU-vs-private financing asymmetry), moderate for Chemicals (diversification framing), a structural fact for White Goods (80% of RAC capacity in top-7 OEMs), weak for Pharma/Auto, EXPLICITLY ABSENT for Steel -- and an earlier automated pass's fabricated ICRA steel claim was caught against the source PDF and retracted in the published bulletin.
- Exim Bank CEAT tracker (May-26 YoY): bank credit to Electronics +23.9%, Vehicles +26.4%, Pharma +22.6%, Iron & Steel +22.6% -- independent corroboration that domestic EBLR-priced credit is funding PLI-sector capacity.

Part 6 Data Infrastructure Assessment

Entries

SOURCE	VERDICT	DETAIL
DPIIT state-wise FDI statistics	Unreliable for hub attribution	Attributed by registered office, not factory location; DPIIT's own metadata says 'Documentation on methodology: Not applicable.' Proof: 9 of Gujarat's top-10 FY2020-21 deals were Jio Platforms (registered Ahmedabad), two years before the Semiconductor Policy. Assam registered \$2...
IEM (DPIIT/NSWS)	Annual series alive, monthly dead, no size filter	See Part 3. The Rs 150cr threshold belongs to MoSPI's separate dataset; no shared key.
MoSPI PAIMANA mega-project portal	Public infrastructure only -- zero coverage of the 10 priority sectors	1,941 Central Sector projects, Rs 41.5 lakh cr revised cost, 15.64% implied cost overrun (computed -- MoSPI stopped publishing 'delayed' classifications after May 2025, a transparency regression). Steel category = SAIL upgrades only; 'Energy Storage' = pumped hydro. Useful only...
AHIDF dashboard (DAHD)	The counter-example: transparency is a choice	Public no-login Power BI, refreshed nightly; state/district/bank-wise; full funnel incl. rejections (11,026 applications -> 1,592 eligible -> 910 sanctioned -> 357 disbursed, ~96% never reach disbursement). Ceiling: aggregates only, stops at 'loan disbursed' -- one gate short of...
PIB	Best current source for disbursal + company names -- with sector-specific blind spots	Parliament-answer releases carry the freshest scheme figures. But PIB names zero companies for Textiles/Steel/Food Processing, and inauguration releases sometimes name only sites, not companies.
Exim Bank trackers	Valuable independent cross-check	Government institution, separate publishing chain; monthly trade/FDI and sector-credit trackers. Deficit figure cross-validated the repo's computation within 0.3%.

SOURCE	VERDICT	DETAIL
Dead/moved domains	Citation hygiene required	pharmaceuticals.gov.in is NXDOMAIN (now pharma-dept.gov.in); makeinindia.gov.in does not exist (makeinindia.com); the legacy DPIIT SIA-statistics route is a dead SPA shell; meity.gov.in and pib.gov.in 403 plain fetches (browser UA works).

Part 7 Action Items

N	ACTION	JUSTIFICATION	OWNER
1	Launch the chemicals/petrochemicals PLI covering Inorganic Chemicals (HS28) and Plastics (HS39)	Combined \$36.4bn FY26 imports growing 46-86% over 5yrs, zero coverage -- the two largest open gaps.	DCPC / Cabinet
2	Extend PLI Textiles to cotton-based apparel (HS61/62)	The only declining export chapters sit in the scheme's structural blind spot; Oct 2025 amendment broadened MMF codes only.	Ministry of Textiles
3	Deepen electronics COMPONENT localization through ECMS	HS85 exports +324% but imports +101.5% to \$104.9bn; ECMS (Rs 22,919cr, open) decides whether the electronics deficit narrows.	MeitY
4	Fix ACC Battery PLI execution before adding new capacity schemes	1 of 40 GWh commissioned, zero disbursed, one awardee quietly gone; the Standing Committee's demanded beneficiary-wise review is the vehicle.	Dept. of Heavy Industry
5	Re-verify the Electronics and Medical Devices FDI reversals next quarter	Both former greens fell 40%+ against a rising cycle; one year warrants amber, two would be a trend.	This repo (quarterly checklist)
6	Publish AHIDF-style application-to-disbursement funnels for every PLI scheme	Capability proven inside government; scheme transparency exposes where approved capacity is stuck.	DPIIT (PLI nodal)

Part 8 Corrections Ledger

- pharmaceuticals.gov.in -> pharma-dept.gov.in (dead domain).
- ~74% China API-dependency figure: not corroborated in DoP's own Annual Report; re-attribute or drop.
- RRPCL belongs to MoPNG (IOCL/BPCL/HPCL JV), not DCPC; still no financial close.
- GE-HAL F414: 'terms finalized Apr 2026, signature pending' -- not 'not signed', not 'signed'.
- Electronics disbursal Rs 15,554cr (~Mar 2026) supersedes Rs 6,834cr (Aug 2024); Auto Rs 2,377.56cr supersedes Rs 1,350.83cr.
- The Rs 28,748cr cross-scheme disbursal figure comes from Parliament-answer PRID 2230621, not the DPIIT Year-End Review.
- Specialty Steel: 14 of 58 Round-1 projects withdrew (PIB-disclosed, absent from steel.gov.in).
- IEM 2025 footnote: both Part A and Part B run 'Up to Dec 2025' (an earlier workbook said Part B to Nov).

- Prior sector verdicts were set on FY2024-25 data; the FY2025-26 re-run moved three (documented, original kept as dated baseline).
- An automated pass fabricated an ICRA steel risk-differentiation claim; caught against the source PDF and retracted in the published bulletin.
- PIB outlay inconsistency (Rs 1.97 vs 1.91 lakh cr) and DAHD/Cabinet AHIDF outlay discrepancy (Rs 29,110 vs 29,610cr): flagged, unreconciled.

Part 9 Infrastructure And Maintenance

Published Outputs

13 bulletins (charts/ + data/), the 22-slide FDI pitch deck (PPTX/PDF), a 1080x1080 social post, tracked quarterly PDF snapshots (reports/published/), and this master report.

Tools

- `scripts/report_synthesizer.py -- schema-agnostic JSON -> PDF/DOCX/PPTX` (pixel-faithful PDF via headless Chrome when paired with chart HTML); `--manifest batch mode over data/repo_manifest_2026-07-19.json`.
- `templates/ -- slide deck, dashboard, report card, and document templates, each with pre-built outputs; build_deck.sh` packages the headless-Chrome -> PNG-per-slide -> `python-pptx -> LibreOffice` pipeline with a `--dashboard mode`.
- `.github/workflows/quarterly-dashboard-refresh.yml -- quarterly PDF snapshot + auto-opened re-verification issue from .github/QUARTERLY_CHECKLIST.md` (now covering 9 ministries, PIB aggregates, Exim trackers, IEM, MoSPI, and rate benchmarks).

Next Refresh Priorities

- Re-verify Electronics and Medical Devices FDI against a second year of data.
- Update disbursal grades against new Parliament-answer PRIDs; fill the four disbursal gaps (Bulk Drugs, Medical Devices, Telecom, Solar PV) via Lok Sabha/Rajya Sabha answers and ministry annual reports -- research pass in flight as of this document.
- Re-extract sector/state splits from the next quarterly FDI factsheet; check the updated FDI metadata document (27 Feb 2026) against the 'methodology: Not applicable' version.
- Watch: chemicals PLI Cabinet approval, PLI Textiles cotton broadening, ACC GSSS re-tender, POSCO-JSW cash landing in FY27 FDI data, Semicon 2.0 approvals.

Part 2b State Implementation IEM

Note

State-wise IMPLEMENTED industrial investment, domestic + foreign combined (IEM Part B, DPIIT AR 2025-26 Appendix V), with intent-to-implementation conversion and FY26 FDI contrast. All-India

2021-2025: Rs 19,51,828cr across 4,859 implemented IEMs; top 3 states = 63.3%.

Top States

RANK	STATE	IMPLEMENTED 2021 25 RS CR	SHARE PCT	A TO B CONVERSION PCT	FY26 FDI USD M	READ
1	Gujarat	660254	33.8	177.8	5713	Both engines; Rs 4.55 lakh cr in 2024-25 alone
2	Odisha	336487	17.2	60.1	84	#2 implementation, 0.14% of FDI -- the domestic-capital state quantified
3	Maharashtra	237988	12.2	34.9	18418	#3 implementation AND #1 FDI
4	Andhra Pradesh	140445	7.2	85.4	609	Domestic-led + selective Sri City FDI
5	Uttar Pradesh	73954	3.8			Noida cluster
9	Tamil Nadu	44627	2.3	49.3	4724	Auto cluster predates window
11	Karnataka	42463	2.2	21.3	12939	The inversion: 22% of FDI, 2.2% of implementation
14	Assam	22620	1.2	83.4	2.37	2023 Tata-era surge in IEM vs \$2.37M FDI

Sector Leaders

RANK	SECTOR	IMPLEMENTED RS CR	SHARE PCT	NOTE
1	Metallurgical Industries	469693	24.1	Rs 2.09 lakh cr in 2025 alone; domestic-funded steel/metals
2	Chemicals (except fertilizers)	286230	14.7	The quiet giant -- #2 with NO PLI scheme
3	Electricals Equipment	189548	9.7	Electronics/white goods in 1951 taxonomy
4	Glass	131208	6.7	ANOMALY: Rs 1.22 lakh cr in one year (2024)
5	Food Processing	102893	5.3	Consistent riser
11	Drugs & Pharmaceuticals	40109	2.1	2025 riser (5x from 2021) -- every pharma measure now points the same way

Caveats

No state-x-sector cross-tab published; conversion is a pipeline-affected flow ratio; Appendix V/VI headers disagree (Dec vs Nov 2025) while summing identically to Rs 5,83,096cr.
